

SPECIAL

Transversing Skatewheel Curve

Product Conveyed:
Various sized cartons.

Hytrol Conveyors Used in Special:
SWC (Gravity Skatewheel Curve)
190 ACC (Horizontal Power Accumulating Conveyor)

How is "Special" used?

The special skatewheel curve is attached

to the discharge end of an existing belt unit which travels via track sideways (Perpendicular to the direction of flow). The skatewheel curve turns the product flow 90 degrees and provides transition onto a Model 190 ACC. A special channel is mounted outside the 190 ACC section which provides support and guarding for the casters while maintaining curve relation to 190 ACC.

How is the product cycled through the unit?

The product is received from three receiving doors and placed on the belt unit. Flow is from the belt conveyor to the special skatewheel curve to the Hytrol Model 190 ACC to the sorting area.

in 24 HOURS!

- ★ 12 Belt Widths
- ★ Center Drive (Reversible)
- ★ Brake Kit
- ★ System Ends
- ★ Double Nose-Over
- ★ Adjustable Floor Supports
- ★ Powered Feeder
- ★ Ceiling Hangers available

Incline/decline conveyors are almost a necessity in multi-level systems. Alternatives include gravity conveyor, spirals and chutes, but these are only adequate when the product is moving down. They also do not generally provide a smooth flow of goods. Powered incline conveyors such as the Hytrol Model RBI (roller bed) and SBI (slider bed) are

excellent for transporting a wide range of products, either up or down. The adjustable double nose-over provides a smooth transfer from the incline to horizontal plane. The conveyor is easily adjustable for angles up to 30 degrees. If needed, the conveyor can also be used as a "booster" in gravity flow systems.

Exploring hytrol.com

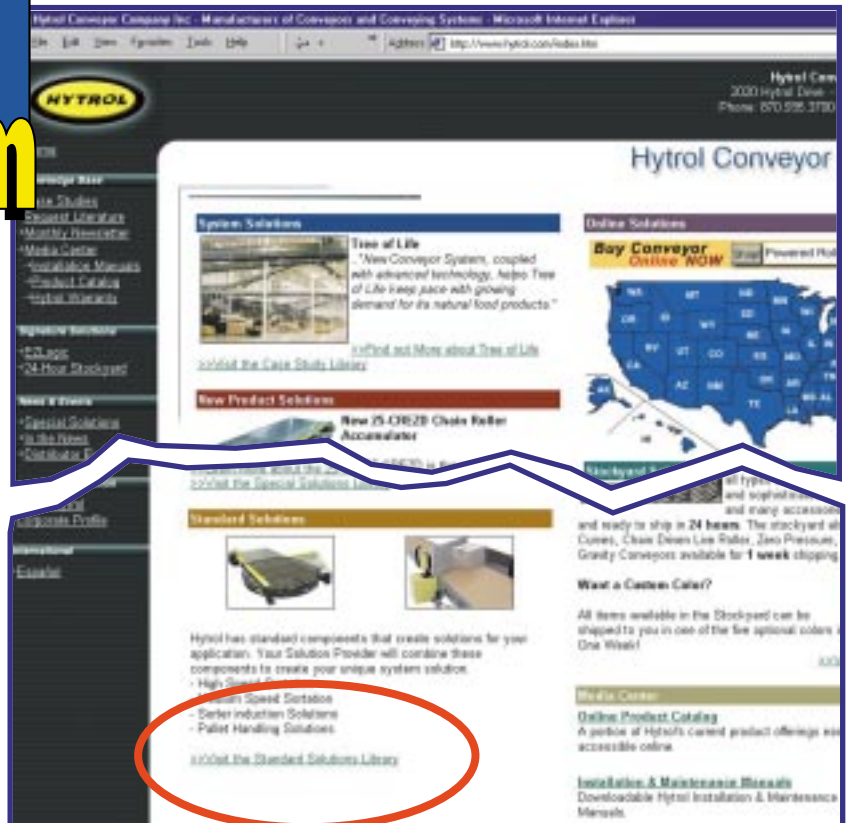

• Standard Solutions

Finding solutions to material handling issues is as easy as the click of your mouse! At www.hytrol.com, Hytrol's website (opening page), just scroll down to the STANDARD SOLUTIONS section and click on the "Visit the Standard Solutions Library" line. . .

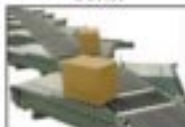

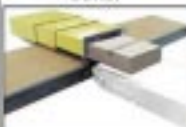

You'll be taken to the STANDARD SOLUTIONS page. Here, you can see the many sortation conveyors and accessories, induction components, and pallet handling conveyors. If you see something that sparks your interest, just click on the "Additional Info" line. . .

A new page will open with more detailed information. And if you would like even more specification facts such as bed widths available, standard specs, optional equipment, etc., you can view Hytrol's catalog sheet by clicking on that line. You also have the option of downloading the catalog sheet.

And, as always, if you have questions about any of Hytrol's conveyors or accessories, your local Hytrol distributor is just a phone call, fax, or email away! He's there to help you. And Hytrol is here to help you find the solution to any material handling issue.
